YORK WATER DISTRICT

Protecting & Providing Drinking Water for Over 100 Years

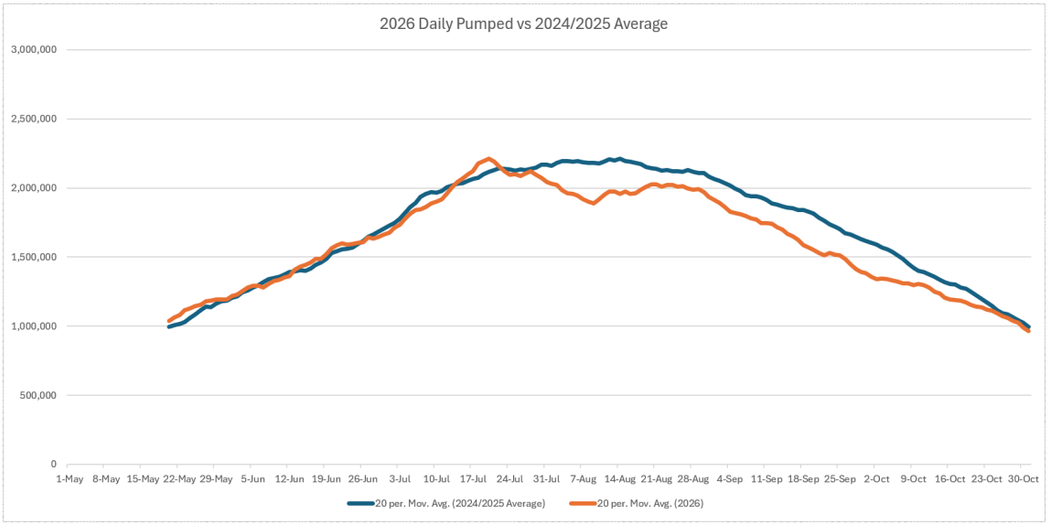
86 Woodbridge Road, York, Maine 03909 • Telephone: (207) 363-2265 • www.yorkwaterdistrict.org

November 23, 2026

Dear York Water District Customers and Irrigation Contractors,

As we near the end of 2026 we wanted to thank you for your cooperation and timely compliance with York Water District's revised irrigation operating requirements.

Together, your efforts reduced hourly water demands across our distribution system, particularly during peak irrigation periods. By following the address-based watering schedules, limiting spray irrigation during daytime hours, and meeting applicable system and documentation requirements, you made a meaningful difference. As shown in the graph below, despite more customers in 2026 the usage during peak irrigation months actually dropped versus the previous two-year average.



Reducing peak demand supports the reliable operation of our water system and advances our long-term conservation and sustainability goals. Most importantly, it helps protect Chase's Pond, our community's only drinking-water source.

Please remember that our region is still in a moderate drought. Even as irrigation season ends, continued mindful water use, indoors and out, will help conserve our supply until conditions improve.

We appreciate the partnership of both customers and irrigation contractors in making these changes successful. Your continued attention to efficient irrigation practices helps preserve a dependable water supply for the entire York community.

If you have questions about the irrigation requirements, please call us at 207-363-2265 or visit www.yorkwaterdistrict.org.

Sincerely,

Trustees & Staff of York Water District
